

Chemicals That Fatten!

[https://naturetoyou.mionegroup.com/pdf/en/otherArticles/Chemicals make you fat .pdf](https://naturetoyou.mionegroup.com/pdf/en/otherArticles/Chemicals%20make%20you%20fat.pdf) Chemicals used as insecticides on crops are also used to fatten livestock by slowing down the metabolic rate. These cannot be removed by washing. This is just one way pesticides and other synthetic chemicals cause more weight gain.
